Skylark Drone Research Launches
[DRONES 4 BOATS](#)

(Annapolis, MD) Skylark Drone Research announces www.Drones4Boats.com to provide boating organizations information needed to set up a drone program.

Affordable, high performance consumer drones are becoming mainstream and it is not surprising that boating organizations are buying and using drones. Drones are being used in a variety of ways, such as instructors filming students junior sailing programs, coaches for improving race performance, race committees to judge races, footage used to promote the club to attract new members, filming of club races to share with members and promote the fleet, and filming of development projects to share status updates with members, just to name a few.

However, before launching a drone program at your boating organization, we recommend that you first gain an understanding of the related FAA regulations, insurance implications, industry requirements, and safety best practices.

[Drones 4 Boats](#)will provide boating organizations what they need to know to operate a drone program. [Drones4Boats](#)provides:

- Help selecting the Right Drone
- Regulations and Certifications
- Places to Get Training
- Image Processing
